What parents are saying about nature camp...

"My daughter has become way more interested in taking care of animals and plants and the environment."

"My son can name every bird and plant that we see. He is always sure to show his friends the [non-native] plants and how to dispose of them."

"My daughter loved every single day and can't wait to go back next year."

**REGISTRATION OPENS January 27th, 8:00 AM**

# Summer 2024 Nature Camps

## SUN Power

During this week of camp, we will learn about the many important roles the sun plays by performing fun solar experiments, cooking with the sun's energy, creating art using the sun, and enjoy plenty of times outdoors in the Colorado sunshine! At the end of this week, campers will "shine brighter" and have a great understanding of how crucial the sun is for life on Earth.

## High as a Hawk

New birds and expert birders alike are welcome at this camp! Your camper will take their understanding of Raptors to new heights! Learn how eagles, hawks, kites, owls, and falcons are adapted to hunt prey, how they raise young, and how they share the sky. Come join us as this exciting camp takes flight.

## Middle School Nature Camp

Bring out your "Inner Naturalist"! Hiking, compass skills, scavenger hunts, stewardship lessons, science experiments, stream explorations, stream studies, art projects, games, archery and more. Adventure abounds in this week of Middle School Camp!

## Water & Weather

Do you have a child who's new to camp? Half-day camp may be perfect for them! Geared toward inexperienced campers, Water and Weather will not only introduce your child to the camp experience but also to Mother Earth. We'll be cloud watching, conducting experiments, hiking, enjoying creek time, and learning!
