

Colorado Centre Drainage Improvements

Construction Update October 7, 2025

Paving operations moving to several locations the week of October 13, 2025

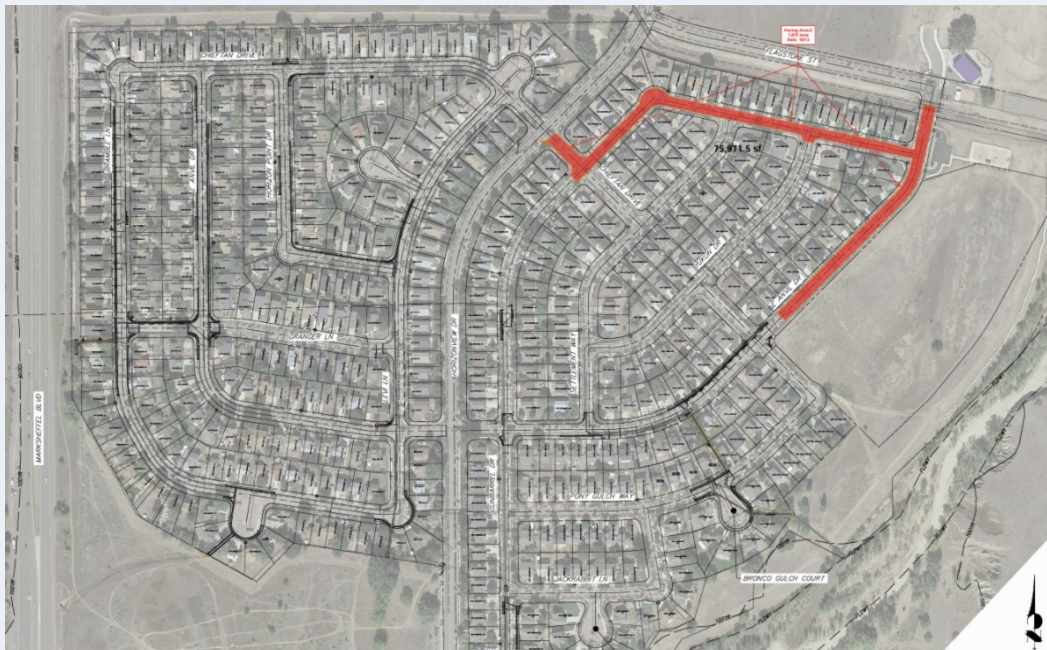

Paving operations are expected to begin Monday, October 13, and will take approximately one week to complete, weather dependent. Road prep work has already begun in the described paving areas.

The paving areas include:

- East Anvil Drive starting at Flagstone Street to the intersection of Pony Gulch Way.
- Gunbarrel Drive starting at the Chieftan intersection to East Anvil Drive.
- Chieftan Drive starting at Horizonview Drive to Gunbarrel Drive.

Lane reductions will be in place throughout paving operations. Residents are advised to follow the construction signage and directions of flaggers as only one lane of traffic will be open while paving is underway.

A ramp will be in place at every residence impacted to maintain property access during paving operations.

Pictured is a map indicating where paving operations will begin the week of October 13 for the Colorado Centre Drainage Improvements project. [CLICK TO VIEW ENLARGED](#)

Next Steps

Road removal for the next pavement area will continue in the upcoming weeks. We appreciate the public's patience and understanding as construction progresses.

Benefits of the Project

The Colorado Centre Drainage Improvements project will primarily seek to improve stormwater drainage infrastructure by installing new underground storm drainage systems and upsizing of existing drainage infrastructure throughout the development. The project will also involve reconstruction of some roadway pavement to improve drainage control and replace fatigued pavement. The improvements are necessary to enhance the function of the storm sewer system and rideability of roadways in the area.

Key Dates

Construction Started: Week of February 20, 2025.

Anticipated Completion: Late 2026, weather dependent.
