Sharing Habitats

Likely to seek out warm locations and holes to denigrate in, raccoons are nocturnal animals. During winter, the weather prevents them from foraging for food. In the spring, they are more active and may cause damage to your property. Educators are privileged to make this exhibit in the springtime environment which makes also feel very pleasant.

Although we may respect to see wildlife, it is important to remember that raccoons are not pets. They are wild animals and should be treated as such. If you see a raccoon, please do not approach it. If you see a raccoon, please do not approach it. If you see a raccoon, please do not approach it.

Preventing this Nightly Raid

Raccoons are nocturnal animals and are active at night. They are also very intelligent and can learn to open doors and windows. To prevent a raccoon from entering your home, please take the following steps:

- 1. Seal all holes and cracks in your home.
- 2. Lock all doors and windows at night.
- 3. Do not leave food or garbage outside.
- 4. Do not leave your car unattended.

Now it's your turn! Take a whiff of these samples and see if you are a raccoon too.

Sharing Habitats

Wildlife and humans share the same planet. In many ways, we share the same habitats. Our homes, our gardens, and our parks are all part of the same ecosystem. We can help protect wildlife by making our habitats more wildlife-friendly. This means providing food, shelter, and nesting sites for wildlife. We can also help protect wildlife by avoiding pesticides and other chemicals that can harm wildlife. By making our habitats more wildlife-friendly, we can help protect wildlife and ensure that they have a place to live.

Preventing this Nightly Raid

Wildlife can be a nuisance when they raid our homes. They can damage our property and steal our food. We can prevent wildlife from raiding our homes by taking a few simple steps. First, we should seal any holes or cracks in our walls or floors. Second, we should keep our food in airtight containers. Third, we should clean up any food or trash that we have lying around. By taking these steps, we can prevent wildlife from raiding our homes and keep our homes safe.
